# WE WENT WEST

## Stix Hooper & Friends

The universality of Jazz is very prevalent in this recording, and it certainly is representative of the universality of this very special musical art form. There is camaraderie, synergy and creative freedom all combined with a kindred approach of musicianship and interpretation among all the musicians. Notice how Russian-born, classical pianist, Eugene Maslov, plays the blues! He respects and appreciates this music and embraces the music in his spirit. This is a striking example of the influence and impact America's indigenous art form, Jazz, has had on the global community.
